

Hi everyone,

We have released a new version of the **Radisson Hotels app (version 9.0)** on 28 Jun: iOS [App Store](#) & Android [Google Play Store](#)

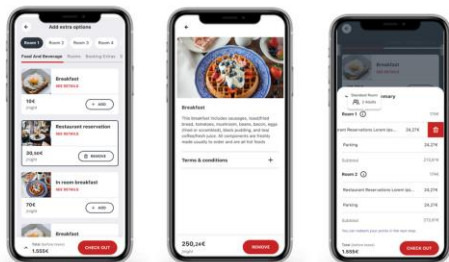

What's New in This Version?

- **Upselling:** possibility of adding extras during the booking process (room upgrades, extra beds, meal plans, experiences...) – **development & testing are covered, feature will be enabled in another app version**
- **Modification of dates for prepaid rates:** prepaid rates can be now modified, as long as there is availability, keeping the original price or paying the balance left at the checkout (if the modified booking price is higher)
- New Loyalty Program enhancements: **tier upgrade pop up redesign**, banners to **increase push notifications & email opt-ins**
- **Sustainable stay** module in property pages
- Capability of adding the booking ID in the newsletter subscription for non-members
- New look for Radisson Blu logo
- [iOS] Upgrade Akamai BMP (Bot Manager Premier) SDK
- Various bug fixes & General optimizations

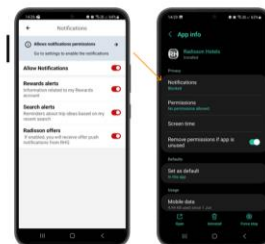

The release notes including the full list of tickets are attached.

As always, thank you to all the teams involved for making it possible!
