

A new website version (9.0.0) will be deployed on Tuesday 27th of June at 4 AM CET.

With this version we mainly focused on:

- Upselling project: possibility of adding extras during the booking process (room upgrades, extra beds, superior meal plans, experiences...)
- Modification of dates for prepaid rates: prepaid rates can be now modified, as long as there is availability, keeping the original price or paying the balance left at the checkout (if the modified booking price is higher)
- Vertical Bookings: the contact centre would be able to generate a 24-hour valid link and send it to the user in order for it to finish the reservation on the web
- New Loyalty Program enhancements: tier upgrade new module, banner to promote the App including member's benefits
- Capability of adding the booking ID in the newsletter subscription for non-members
- New look for Radisson Blu logo
- Various SEO, content and performance improvements

As always a big thank you to everyone involved in the process!

Best regards,
Alejandra

PS// The full list of tickets included:

Enhancements

NEWWEB-32246	Price component & upselling - Upselling page
NEWWEB-32248	Price component & upselling - Checkout summary
NEWWEB-35775	\[LCP\] TripAdvisor widget serving too big images on review pages
