

New Web Version 10.0.0

Release highlights:

New Room Display

After activating the New Room Display design, some areas of improvement were detected. We have reworked the design and are now ready to reimplement the new display via an A/B test where we will be monitoring its performance.

Design improvements:

- Toggle enabling the switch from member rates to public rates (or vice versa) is displayed directly below the rate name, to attract more attention
- Toggle accompanied by a reworked message, encouraging users to book member rates or reinforcing the discount applied for users already logged in
- Member Only rates will be always showcased by default, except for cases where the user arrives via a metasearch
- Labels indicating the special rate type have a new design so clearly differentiated from the rest of the information present in the rate card
- Buttons for the meal plans and the check-out Call To Action (CTA) have been aligned
- Room information has been redesigned for enhanced user visibility
- Mobile phone adaptation of the above-mentioned improvements

New Radisson Rewards number format

Due to some issues with the Radisson Rewards number, a new display has been implemented across the website to ensure the following:

- The format of the number is split into 4 blocks of 4 digits (like credit cards). The display is therefore more visually appealing and intuitive for the user
- New format is displayed in every section of the website where the number is retrieved

Users accepting email communications—New Loyalty Program

As part of the New Loyalty Program, a new feature has been developed. We now encourage members to interact on the website and get rewarded when email communications are accepted:

- If user is a new member, recently enrolled, or signed in within the first 30 days, a pop-up asking to opt in to email communications will be displayed in the private area
- If a member for over 30 days or previously declined the notifications, the dashboard will display an eye-catching banner encouraging the user to receive marketing offers

Note: this functionality will be released on the 25th, however it will be showing as soon as the content is ready from the Loyalty team side.

Invoices of past stays

Users will be now able to download the invoices of their past stays.

Invoices will be available for:

- EMMA hotels—under the label 'Request invoice'
- OPERA hotels—under the label 'Request invoice by email'

Release notes:

Important bug fixes

- Improved color compatibility in the different tabs of mosaic galleries
- Travel Agent ID number is saved during B2B program enrolment
- Images can now be added to chosen tabs in galleries
- Welcome message for new members is clearly displayed in different available languages

- Correct journey for expired/invalid links accessed in VeBo (Vertical Bookings) reservations
- Clarity in price summary when Upselling options are added to the booking
- Reservation dates are correctly added to the personal calendar
- Booking summary of upcoming reservations is correctly displayed in different languages available
- Mirroring of web automated room galleries and IcePortal listings

New enhancements

- External booking capabilities now applied to Destination pages
- Users can now control the functionality of videos in the Property Pages
- Lazy loading for virtual tours is enabled on Overview and M&E pages, and virtual tour templates where tours are embedded
- Countdown displayed on Upselling page, indicating the time remaining to complete booking before session expires

Release notes – New App Version 10.0

What's new in this version?

- iOS only—Quantum metric SDK implementation: a new tool to get insights in Conversion funnel and UX
- Members can now request invoices for their past bookings
- Upselling—improved UX with a loading skeleton and countdown timer
- External booking bug fix in property pages and room displays to prevent internal bookings
- Airship—screen configurations to prepare for future in-app messages
- Choice Hotels decommission—removing references from RH America
- Security pen test
- Android only—Airship SDK major upgrade (v17)
- Various bug fixes and general optimizations
